SMART. FLEXIBLE.

POWERFUL

NSS
SECURITY
SOLUTIONS

Intruder Solution of the Year
Voted by security installers at
the 2022 PSI Premier Awards

See the **FULL PICTURE**

Whether near or far, you can now feel in touch with what is happening in your home.

By installing VUpoint IP cameras, available in both indoor and outdoor models, you can verify that your children arrived home safely from school or check on an elderly parent, simply by using our smartphone app, so that you can feel totally at ease.

If there is an alarm event, whether a suspected intrusion or a safety threat, you will receive a real-time notification with video clips or still images of your home, directly to your smartphone, so that you can decide if and how to react.

FEEL CLOSE

Even when far away

Protect your home and family with a comprehensive security system that offers you so much more. Feel in control even when you are away with an easy to use smartphone app enabling you to control the system remotely and receive notifications regarding its status.

If there is an alarm event, you or your security provider will receive video clips or still images of your home so that you can determine if there is a real threat and if you need to take further action. You can also initiate live video anytime with the touch of a button if you have any concerns, to ensure that your home and family are safe.

Rest assured, this is the **most advanced and cyber-secure platform in the industry**, hosted on Microsoft Azure, with additional layers of security making it as secure (if not more) than online banking.

PERFECT

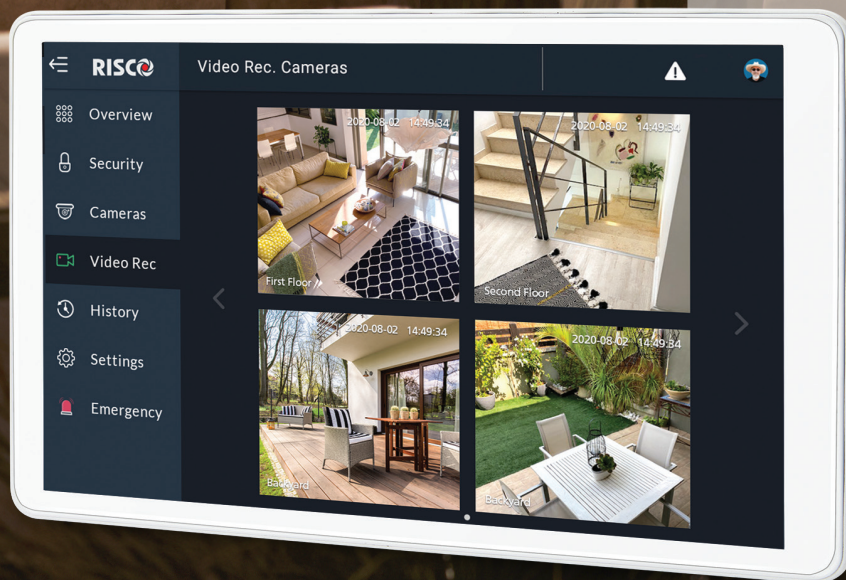

combination of
technology and
design

The award winning RisControl smart touchscreen keypad provides you with enhanced security and control.

As a responsive, full colour, high resolution 8" touchscreen keypad, RisControl offers an intuitive, easy to use interface. Keypad functions are presented in an intuitive way allowing you to learn your security system in no time.

Furthermore, it allows you to easily and quickly view live video and recordings from VUpoint IP cameras.

With RisControl, you can control all alarm and cloud-based solutions from one access point. And with a design that fits in any space, the keypad is suitable for various applications.

Technological Innovation of the Year
